

BOLDENONE UNDECYLENATE

Active Ingredients: Boldenone Undecylenate 200 mg

DISCRIPTION

Boldenone – is a synthetic steroidal anabolic drug with an active component Boldenone which is derived from the male sex hormone testosterone. Boldenone was used in veterinary, mostly for the treatment of horses, when they must gain weight, improve appetite, coat, increase energy and muscle mass, general physical condition. Now the drug is also used in bodybuilding. Despite the differences in the physiology of animals and humans, it excellently builds muscle mass and accelerates synthetic processes. Boldenone as powerful as testosterone in its anabolic properties, while the androgenic properties of the drug are half as weak. Boldenone can be combined with other anabolic steroids, thereby achieving a synergistic effect
