

# METHANDIENONE

**Active Ingredients:** Methandrostenolone 10 mg

## DISCRIPTION

Methandienone tablets contain the active substance methandienone, a derivative of testosterone with slightly reduced androgenic properties. Its anabolic effect is more pronounced than androgenic. Therefore, methandienone increases protein synthesis, incites the formation of bone basic material, a necessary condition for increasing skeletal calcium reserves, and prevents calcium and nitrogen removal from the kidneys. The anabolic effect provokes increased appetite, weight gain and an improvement in the general condition of the body.

**Storage:** Store in a dark, dry place, at room temperature. Do not refrigerate Keep out of reach of children.

**Product Content:** Each Tablet Contains 100
